## Office Memorandum • UNITED STATES GOVERNMENT

TO : Executive for Administration & Management  
THRU: Executive Director  
FROM : Deputy Director

DATE: 1 March 1948

SUBJECT:

25X1A

25X1A

On Sunday, 29 February 1948, I dropped by the [REDACTED] area for a casual inspection of the area. While I realize the difficulties involved in keeping such an area policed, in view of our personnel situation, it would still appear we can do better than accept the condition of the area as I found it.

There still remains a considerable amount of war-time signal equipment (boxed) in the pile just north of the temporary building in the center of the area. That equipment should be placed in covered storage or shipped at the earliest practicable date. In the meantime, the method of arrangement is entirely unsatisfactory.

A large number of army-type vehicles of all types were parked in a disorderly fashion throughout the area. I realize that many of these vehicles are in the process of disposal but am convinced they could be parked in better fashion.

A government vehicle of the laundry-vehicle type was parked close to one wall of the old warehouse. Not only was it parked in a sloppy manner but, in the location parked, was definitely a fire hazard.

Either the Director or myself will inspect the warehouse area, including the interior of the buildings, within the next ten days. It might be desirable to inform the responsible personnel.

/s/ E. K. Wright  
E. K. WRIGHT  
Brigadier General, USA

*Inspected by  
Exec for Admin  
6 Mar '48 and  
found in satisfactory  
condition.*
